## Intense School CISSP® Boot Camp - Course Description

Intense School offers this top-notch CISSP® Boot Camp to train and prepare individuals for the Certified Information Systems Security Professional (CISSP) certification exam, the premier security certification created and administered by the International Systems Security Certification Consortium (ISC<sup>2</sup>). CISSP holders have the necessary skills and best practices to effectively create and execute enterprise-wide information security strategies.

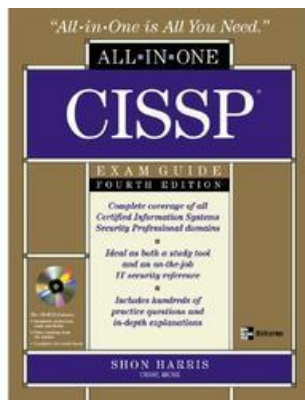

Intense School's award-winning CISSP course focuses on preparing students for the CISSP exam through extensive mentoring and drill sessions, review of the entire body of knowledge, and practical question and answer scenarios, all through a high-energy seminar approach. Our CISSP Boot Camp is the product of a wide range of leading industry experts and authors, and our training materials are considered the absolute best for CISSP preparation.

## 5 Reasons why you get more with the Intense School CISSP® Boot Camp!

1. Our materials are always updated for you with the latest information on the exam objectives: This is NOT a CBK review-it is intense preparation for CISSP certification, guaranteeing your success.
2. You will receive Expert Mentoring by veteran security professionals before and after class guide you to success
3. We focus on preparing you for the CISSP certification exam through drill sessions, review of the entire CBK, and practical question and answer scenarios, all following a high-energy seminar approach.
4. Our CISSP training course is the product of a wide range of leading industry experts and authors, and is considered the absolute best materials for CISSP preparation.
5. With our CBK Experts and CISSP insiders, we have developed a reputation for getting at the secrets of the CISSP certification exam

## CISSP Course - Benefits and Goals

The goal of the course is to prepare professionals for the challenging CISSP exam by covering the objectives of the exam as defined in the (ISC<sup>2</sup>) common body of knowledge. CISSPs are expected to have a broad range of skills across security policy development and management, as well as a technical understanding of a wide range of security controls across all disciplines within IT Security. Our program will provide you with a quick and proven method for mastering this huge range of knowledge. Intense School's Boot Camp is primarily designed around the CISSP exam held in each specific area enabling you to receive an unmatched, intense, six (6) day total immersion training experience with the seventh day reserved to take the exam along with transportation to and from the exam proctored by ISC<sup>2</sup>.

*Only Intense School's CISSP Boot Camp offers you the following benefits:*

- Six full days of the best CISSP training in the industry
- Transportation to and from the test on the seventh day of the course
- First Class, exclusive curriculum
- In-person access to the top security experts in the industry
- Intense School's proprietary practice questions
- Pre-Class Preparation
- Quality Targeted Books Shipped to you before class
- Shon Harris All-in-One CISSP® Study Guide 4th Edition
- Exam Study Guidance by a CISSP course instructor before and after class
- Lunch and snacks provided on each day of class
- Opportunity to re-sit a classroom-based course for up to one year

**NOTE:** Intense School's Proprietary CISSP materials are regularly maintained, and synchronized with the latest exam objectives with integrated materials from the Official (ISC)<sup>2</sup> Guide to the CISSP Exam.

# Intense School's CISSP® Boot Camp

## Who Should Attend

- C-Level Professionals
- Information Security Professionals
- Professionals with four (4) or more years experience or exposure to Information Security practices

## Prerequisites

The CISSP certification program is targeted at professionals with at least 4 years of experience in 2 domains and a college degree or 5 years experience in 2 domains without a college degree.

## Course Objectives

Upon Completing our CISSP Boot Camp you will gain valuable knowledge and skills including the ability to:

- Competently identify and handle security threats
- Gain credentials as a leading security professional for current and future employment
- Thoroughly understand the 10 essential core domains of the common body of knowledge:
  1. Access Control
  2. Application Security
  3. Business Continuity and Disaster Recovery Planning
  4. Cryptography
  5. Information Security and Risk Management
  6. Legal, Regulations, Compliance and Investigations
  7. Operations Security
  8. Physical (Environmental) Security
  9. Security Architecture and Design
  10. Telecommunications and Network Security

## The TOTAL Immersion Experience

During the Seven (7) Day program, our instructors give you 100% of their time and dedication to ensure that your time is well spent. You will receive an all-inclusive immersion experience by receiving your hotel stay and most meals during your training experience; therefore you eat, sleep and train at the learning facility with no distractions! The typical daily schedule rolls out as follows:

**Intense School's CISSP Boot Camp - 7 Day Schedule**

## Intense School's Pre-Class Preparation

Signing up for Intense School's CISSP Boot Camp means more than just attending a seven (7) day program. The program starts with the following pre-class preparation materials:

- Quality, targeted prep books shipped directly to you prior to start of class
- Email access to a qualified CISSP course instructor before and after class for exam study guidance

## Post-Class Follow up and Support

Even after the course, we are here to provide support, including:

- Post-class CISSP expert mentoring
- Option to retake the class for up to a year (or until you obtain certification, whichever comes first)

## Career Path-Related Courses

The courses below are excellent follow-on classes, once the CISSP Boot Camp has been completed:

- CEH (Professional Hacking) Boot Camp
- CCE (Computer Forensics) Boot Camp

## Certified Professional Exam

Intense School's CISSP Boot Camp extensively prepares students for the following Certified Professional exam:

- ISC2 CISSP Exam

## Testimonials

*"Intense School's CISSP boot camp provides a very direct and focused review of the CBK and provides a framework for understanding how to approach the exam, which is unlike any other in the industry. Provided that you follow their program closely, including advance study of the materials they provide as a part of their comprehensive package, this camp will be a week very well spent."*

Rob Carey, CISSP  
Sr. Security Partner Manager, Symantec  
President, South Florida Chapter of ISSA

*"I think the amount of time was appropriate, the information was relevant and well-summarized, and the test reflected the study materials well. My instructor did a great job. My Training Sales Representative has also been very helpful and I am glad that he had taken a great interest to follow up during class to with the students. I am very pleased with Intense School and the entire process."*

Ryan Argomaniz, CISSP  
AVP, Specialist – Info Security Engr  
Bank of America

*"This class has been an outstanding experience for me. The instructor has a way of presenting material at a level that all can relate to. There is a lot of information with regards to this course, but he helps you to pinpoint your weak areas and turn them into to strengths. Thank you so much for this experience."*

Phyllis Moore  
Booz Allen Hamilton

## Intense School's CISSP® Course Details

### Day 1

#### *Introduction*

#### **Information Security and Risk Management**

- Management Responsibilities
- Security Policies and their supporting counterparts
- Information Classification
- Roles and Responsibilities
- Risk Management
- Security Awareness

#### **Access Control**

- Identification, authentication, authorization methods
- Authentication methods, models and technologies
- Discretionary, mandatory and non-discretionary access control
- Accountability, monitoring and auditing practices
- Possible threats to access control practices and technologies

### Day 2

#### **Security Architecture and Design**

- Computer architecture and the items that fall within it
- Components within an operating system
- OSI Model
- Trusted computing base and security mechanisms
- Different security models used in software development
- Security criteria and ratings
- Certification and accreditation processes

#### **Business Continuity and Disaster Recovery Planning**

- Business Continuity Planning
- Disaster Recovery Planning
- Possible Threats
- Business Impact Analysis
- Roles and Responsibilities

#### *Backups and Off-site Facilities*

### Day 3

#### **Cryptography**

- History of cryptography
- Cryptography components and their relationships
- Government involvement in cryptography
- Symmetric and asymmetric key cryptosystems
- Public key infrastructure (PKI) concepts and mechanisms
- Hashing algorithms and uses
- Types of attacks on cryptosystems

#### **Physical (Environmental) Security**

- Administrative, technical and physical controls pertaining to physical security
- Facility location, construction and management
- Physical security risks, threats and countermeasures

- Electrical issues and countermeasures
- Fire prevention, detection and suppression
- Authenticating individuals and intrusion detection

### Day 4

#### **Telecommunications and Network Security**

- TCP/IP Suite
- Cabling and data transmission types
- LAN and WAN technologies
- Network devices and service
- Telecommunication protocols and devices
- Remote access methods and technologies
- Fault tolerance mechanisms

#### **Legal, Regulations, Compliance and Investigations**

- Ethics, pertaining to security professionals and best practices
- Computer crimes and computer laws
- Motivations and profiles of attackers
- Computer crime investigation process and evidence collection
- Incident handling procedures
- Different types of evidence
- Laws and acts put into effect to fight computer crime

### Day 5

#### **Application Security**

- Different types of software controls and implementation
- Database concepts and security issues
- Data warehousing and data mining
- Software life cycle development processes
- Change control concepts
- Object-oriented programming components
- Expert systems and artificial intelligence

#### **Operations Security**

- Operations responsibilities
- Configuration management
- Media access protection
- System recovery
- Facsimile security
- Intrusion detection systems
- Attack types

### Day 6

#### **Review of all ten domains**

Practice Exam (289 Sample questions)

### Day 7

**Shuttle to exam and sign-in for actual CISSP exam\***

## **\*IMPORTANT NOTICE\***

Students are responsible for registering and paying for the exam directly with ISC2. This should be taken care of as soon as possible to avoid additional fees or an over-booked exam. Actual exam proctored by ISC2.

## **Intense School's 100% Satisfaction & Human Capital Guarantee**

Intense School is committed to you having the best possible training experience available. If during the first day of any classroom-based or Live Online course the student is not fully satisfied and wishes to withdraw, the student will receive a 100% refund, less any applicable fees. We also offer students the opportunity to re-sit a Classroom-based or Live Online course tuition-free for up to one year or until the student obtains certification, whichever comes first. Our Human Capital Guarantee ensures a successful return on investment for employers. If an employer has paid the cost of a class for an employee who leaves within three (3) months of obtaining certification, Intense School will train an additional employee of the company at no tuition cost to the employer for up to 12 months. Any employer may request their Intense School graduate re-sit the course tuition-free within three (3) months of the completed training if the employee is not successfully performing a job duty related to the class that was taken. \*

## **Corporate On-Site Discounts**

Your Company will Save Big on group on-sites of **6 or more students**. Get CISSP Certification Training FAST on-site at your location for a fraction of the price of our public scheduled Boot Camps!

## **Additional Delivery Methods Available To You:**

- Live Online
- Self-Paced

## **Our Training School At-A-Glance**

Intense School is the #1 accelerated IT training school in the world for good reason – our Expert Instructors are industry-recognized leaders, authors, and experts in their fields. We have mastered the accelerated method of training and certification and take pride in offering you the same quality training and certification programs that more than 45,000 satisfied clients have raved about.

Intense School's Expert Instructors possess strong consulting, implementation and training expertise. Our security professionals come from diverse roles including positions in consulting, product development, project management, information security and information technology. Our training team has supported public and private corporations, technology vendors, telecommunications companies and professional services organizations around the world.
